How to perform a search

- Address Search

Use this search option to locate properties using a street number, name or direction.

- For best results leave off the street suffix.
- Use the * as a wild card to match any string of characters (when unsure of spelling or to return all results on a particular street). A wild card is assumed at the end on any string of characters.

Type	Results
Woodland	All addresses on a street with the name Woodland in it: # Woodland Dr # Woodland Hills Way
Ba*	All addresses on a street beginning with "Bay": # Bay Ct # Babbitz Ave # Baldwin
*wood	All addresses on a street ending with "wood": # Birchwood # Southwood # Underwood

How to view property details

- **Navigating Search Results**

Your search results may include one, five, ten or hundreds of property records. Before you open a property record to review it in detail, you can optionally navigate to one that is of interest to you in the results list, then select and view it first. This can save you considerable time if your search results are large. In addition, after viewing record details, you can return to this list at any time to select another record. To view record details you have several options.

1. Click the row in the Results grid for the property you wish to view in more detail.
2. Results display 15 per page, this indicates the total number of properties in this result set.
3. Provides a printable summary of the Results grid.
4. Displays total number of pages this search returned. You can select a page number or click the next/previous arrows to navigate.
