ARTICLE XXXIV **DEMOLITION DELAY**

TITLE OF BY-LAW

The Preservation of Historically Significant Buildings.

INTENT AND PURPOSE

This by-law is enacted for the purpose of preserving and protecting significant buildings within the Town of Dighton which constitute or reflect distinctive features of the architectural, cultural, economic, political or social history of the town and to limit the detrimental effect of demolition on the character of the town. Through this bylaw, owners of preferably preserved buildings are encouraged to seek out alternative options that will preserve, rehabilitate or restore such buildings and residents of the town are alerted to impending demolitions of significant buildings. By preserving and protecting significant buildings, streetscapes and neighborhoods, this bylaw promotes the public welfare by making the town a more attractive and desirable place in which to live and work. To achieve these purposes the Historical Commission is authorized to advise the Building Inspector with respect to demolition permit applications. The issuance of demolition permits is regulated as provided by this by-law.

DEFINITIONS

APPLICANT

Any person or entity who files an application for a demolition permit. If the applicant is not the owner of the premises upon which the building is situated, the owner must indicate on or with the application his/her assent to the filing of the application.

APPLICATION

An application for the demolition of a building.

BUILDING

Any combination of materials forming a shelter for persons, animals, or property.

BUILDING COMMISSIONER

The person occupying the office of Building Commissioner or otherwise authorized to issue demolition permits.

COMMISSION

The Dighton Historical Commission or its designee.

DEMOLITION

Any act of pulling down, destroying, removing, dismantling or razing a building or commencing the work of total or substantial destruction with the intent of completing the same.

DEMOLITION PERMIT

The building permit issued by the Building Inspector for a demolition of a building, excluding a building permit issued solely for the demolition of the interior of a building.

PREFERABLY PRESERVED

Any significant building which the Commission determines, following a public hearing, that it is in the public interest to be preserved rather than demolished. A preferably preserved building is subject to the six month demolition delay period of this bylaw.

SIGNIFICANT BUILDING

Any building within the town (city) which is in whole or in part one hundred years or more old and which has been determined by the Commission or its designee to be significant based on any of the following criteria:

- The Building is listed on, or is within an area listed on, the National Register of Historic Places; or
- The Building has been found eligible for the National Register of Historic Places; or
- The Building is importantly associated with one or more historic persons or events, or with the broad architectural, cultural, political, economic or social history of the Town or the Commonwealth; or
- The Building is historically or architecturally important (in terms of period, style, method of building construction or association with a recognized architect or builder) either by itself or in the context of a group of buildings.

PROCEDURE

No demolition permit for a building which is in whole or in part one hundred years or more old shall be issued without following the provisions of this bylaw. If a building is of unknown age, it shall be assumed that the building is over 100 years old for the purposes of this bylaw.

An applicant proposing to demolish a building subject to this bylaw shall file with the Building Commissioner an application containing the following information:

- The address of the building to be demolished.
- The owner's name, address and telephone number.
- A description of the building.
- The reason for requesting a demolition permit.
- A brief description of the proposed reuse, reconstruction or replacement.
- A photograph or photograph(s) of the building.

The Building Commissioner shall within seven days forward a copy of the application to the

Commission. The Commission shall within fifteen days after receipt of the application, make a written determination of whether the building is significant.

Upon determination by the Commission that the building is not significant, the Commission shall so notify the Building Commissioner and applicant in writing. The Building Commissioner may then issue the demolition permit.

Upon determination by the Commission that the building is significant, the Commission shall so notify the Building Commissioner and the applicant in writing. No demolition permit may be issued at this time. If the Commission does not notify the Building Commissioner within fifteen days of receipt of the application, the Building Commissioner may proceed to issue the demolition permit

If the Commission finds that the building is significant, it shall hold a public hearing within thirty days of the written notification to the Building Commissioner. Public notice of the time, place and purpose of the hearing shall be posted in a conspicuous place in town hall for a period of not less than seven days prior to the date of said hearing and the applicant and the building inspector shall be notified in writing of the meeting time and place.

The Commission shall decide at the public hearing or within fourteen days after the public hearing whether the building should be preferably preserved. If agreed to in writing by the applicant, the determination of the Commission may be postponed.

If the Commission determines that the building is not preferably preserved, the Commission shall so notify the Building Commissioner and applicant in writing. The Building Commissioner may then issue the demolition permit.

If the Commission determines that the building is preferably preserved, the Commission shall notify the Building Commissioner and applicant in writing. No demolition permit may then be issued for a period of six months from the date of the determination unless otherwise agreed to by the Commission.

If the Commission does not so notify the Building Commissioner in writing within twenty one days of the public hearing, the Building Commissioner may issue the demolition permit.

Upon a determination by the Commission that any building which is the subject of an application is a preferably preserved building, no building permit for new construction or alterations on the premises shall be issued for a period of six months from the date of the determination unless otherwise agreed to by the Commission.

No permit for demolition of a building determined to be a preferably preserved building shall be granted until all plans for future use and development of the site have been filed with the Building Commissioner and have found to comply with all laws pertaining to the issuance of a building permit or if for a parking lot, a certificate of occupancy for that site. All approvals necessary for the issuance of such building permit or certificate of occupancy including without limitation any necessary zoning variances or special permits, must be granted and all appeals from the granting of such approvals must be concluded, prior to the issuance of a demolition permit under this section.

The Building Commissioner may issue a demolition permit or a building permit for a preferably preserved building within the applicable delay period if the Commission notifies the Building Commissioner in writing that the Commission finds that the intent and purpose of this bylaw is served even with the issuance of the demolition permit or the building permit.

Following the six month delay period, the Building Commissioner may issue the demolition permit.

ADMINISTRATION

The Commission may adopt such rules and regulations as are necessary to administer the terms of this bylaw.

The Commission is authorized to adopt a schedule of reasonable fees to cover the costs associated with the administration of this bylaw.

The Commission may delegate authority to make initial determinations of significance to one or more members of the Commission or to a municipal employee.

The Commission may pro-actively develop a list of significant buildings that will be subject to this bylaw. Buildings proposed for the significant building list shall be added following a public hearing.

EMERGENCY DEMOLITION

If after an inspection, the Building Commissioner finds that a building subject to this bylaw is found to pose an immediate threat to public health or safety due to its deteriorated condition and that there is no reasonable alternative to the immediate demolition of the building or structure, then the Building Commissioner may issue an emergency demolition permit to the owner of the building or structure. The Building Commissioner shall then prepare a report explaining the condition of the building and the basis for his decision which shall be forwarded to the Commission.

ENFORCEMENT AND REMEDIES

The Commission and/or the Building Commissioner are each specifically authorized to institute any and all actions and proceedings, in law or equity, as they may deem necessary and appropriate to obtain compliance with the requirements of this by-law or to prevent a threatened violation thereof.

Any owner of a building subject to this bylaw that demolished the building without first obtaining a demolition permit in accordance with the provisions of this bylaw shall be subject to a fine of not more than Three Hundred Dollars. Each day the violation exists shall constitute a separate offense until a faithful restoration of the demolished building is completed or unless otherwise agreed to by the Commission.

If a building subject to this bylaw is demolished without first obtaining a demolition permit, no building permit shall be issued for a period of two years from the date of the demolition on the subject parcel of land or any adjoining parcels of land under common ownership and control unless the building permit is for the faithful restoration referred to above or unless otherwise agreed to by the Commission.

HISTORIC DISTRICT ACT

Following a determination that the building is significant and preferably preserved, the Commission may

recommend to town meeting that the building be protected through the provisions of Massachusetts General Law, Chapter 40C, and the Historic Districts Act. The steps required under M.G.L. Chapter 40C shall be followed prior to the establishment of a local historic district. Nothing in this by-law shall be deemed to conflict with the provisions of the Historic District Act, Massachusetts General Laws Chapter 40C. If any of the provisions of this by-law do so conflict, that act shall prevail.

SEVERABILITY

In case any section, paragraph or part of this by-law be for any reason declared invalid or unconstitutional by any court, every other section, paragraph, and part shall continue in full force and effect.

(ATM 06/07/2011)

ARTICLE XXXV **REMOVAL OF SOIL, LOAM, SAND AND GRAVEL**

Amended (ATM 06/06/2005)

(STM 10/07/1986)

ARTICLE XXXVI **CONSERVATION BY-LAW**

I Purpose

The purpose of this bylaw is to protect the wetlands, water resources, and adjoining land areas in the Town of Dighton by conditioning activities deemed by the Conservation Commission likely to have a significant or cumulative effect upon the resource area values, including but not limited to the following: public or private water supply, ground water, flood control, erosion and sedimentation control, storm damage prevention including coastal

storm flowage, water quality, water pollution control, fisheries, shellfish, wildlife habitat, rare species habitat including rare plant species, agriculture, aquaculture, and recreation values, deemed important to the community. This bylaw is intended to utilize the Home Rule authority of this municipality to protect additional resource areas, for additional values, with additional standards and procedures stricter than those of the Wetlands Protection Act (G.L.Ch.131~40)and Regulations hereunder (310 CMR10.00).

II **Jurisdiction**

Except as permitted by the Conservation Commission or as provided in this bylaw, no person shall commence to remove, fill, dredge, build upon, degrade, discharge into, or otherwise alter the following resource areas: any freshwater or coastal wetlands; marshes; wet meadows; bogs; swamps; vernal pools; banks; reservoirs; lakes; ponds of any size; rivers; streams; creeks; beaches; dunes; estuaries; the ocean; land under water bodies; lands subject to flooding or inundation by groundwater or surface water; land subject to tidal action, coastal storm flowage, or flooding; and lands within 100 feet of any of the aforesaid resource areas; rivers, streams, and creeks whether perennial or intermittent; and lands within 200 feet of any river, stream, or creek; and lands abutting any of the aforesaid areas. Said resource areas shall be protected whether or not they border surface waters.

III **Applications for Permits and Requests for Determination**

Written application shall be filed with this Commission to perform activities affecting resource areas protected by this bylaw. This application should be the standard form as set forth by the Massachusetts Department of Environmental Protection (DEP).

At the time of a permit application, the applicant shall pay a filing fee as set forth by the DEP. A local fee of per the table below made payable to Town of Dighton- is required for all filings in addition to the local portion set forth by the DEP, See Below Section 16.

The Commission may waive the filing fee, consultant fee and costs and expenses for a permit application or request for determination filed by a government agency and shall waive them for a request for determination filed by a person having no financial connection with the property which is the subject of the request.

At the time a permit application is received, or at any time during the hearing process, the Commission is authorized to require an applicant to pay the fee for specific expert engineering and other consultant services deemed necessary by the Commission to come to a final decision on the application. The Commission will select the consultant in question. As provided by Massachusetts General Law Chapter 44, Section 53G, The Dighton Conservation Commission may employ reasonable fees for the employment of outside consultants engaged by the Commission, for specific outside expert services. Such services shall be deemed necessary by the Commission to come to a final decision on an application submitted to the Conservation Commission pursuant to the requirements of the Wetlands Protection Act (M.G.L. Ch. 131 Section 40), the Dighton Wetlands Protection Bylaw, the Conservation Commission Act (M.G.L. Ch. 40 Section 8C) or any other state or municipal statute, bylaw, or regulation as they may be amended from time to time. The Conservation Commission may also impose fees for other consultant services, related to application review, or permit conditioning or monitoring, under any of the above referenced laws or regulations.

Said fees for said services shall be set forth in a regulation to be adopted by vote of the Conservation Commission in accordance with applicable law, including but not limited to M.G.L. Chapter 44 Section 53G.

The Commission may waive the filing fee, consultant fee and costs and expenses for a permit application or request for determination by a government agency.

The Commission shall require the payment of the consultant fee prior to the initiation of consulting services. Failure by the applicant to pay the consultant fee specified by the Commission or its duly authorized Agent within ten (10) business days of the request for payment, or refusal of payment, shall be cause for the Commission to deny the application based on lack of sufficient information to evaluate whether the project meets applicable performance standards in 310 CMR 10.00 and the Dighton Wetlands Protection Bylaw or its regulations.

The applicant shall pay the fee to the Town of Dighton to fund the 53G consultant services account established by the Commission with the Town Treasurer's office, which may be drawn upon by the Commission for specific consultant services approved by the Commission at one of its public meetings.

The Commission shall return any unused portion of the consultant fee to the applicant upon the completion of the project along with any accrued interest.

IV **Notices and Hearings**

Any person filing a permit application with this Commission at the same time shall give written notice thereof, by certified mail (return receipt) or hand delivered, to all abutters at their mailing address shown on the most recent applicable tax list of the assessors, including owners of land directly opposite on any public street or way, and abutters to the abutters within 300 feet of the property line on which the applicant is proposing work, including any in another municipality or across a body of water.

The Commission may combine its hearing under this bylaw with the hearing conducted with the Wetlands Protection Act (G.L. Ch.131~40) and Regulations (310 CMR 10.00).

The Commission shall have the authority to continue the hearing to a certain date announced at the hearing, for reasons stated at the hearing, which may include receipt of additional information from the applicant or other deemed necessary by the Commission.

V **Coordination with Other Boards**

Any person filing a permit application with the Commission shall provide a copy at the same time, by certified mail or hand delivered, Selectmen, planning board, board of health and building inspector, Stormwater Committee and Highway Superintendent.

VI **Permits and Conditions**

If the Commission, after a public hearing, determines that the activities which are subject to the permit application or the land and water uses which will result there from are likely to have a significant individual or cumulative effect upon the resource area values protected by this bylaw, the Commission, within 21 days of the close of the hearing, shall issue or deny a

permit for the activity requested. If it issues a permit, the Commission shall impose conditions, which the Commission deems necessary or desirable to protect those values, and all activities shall be done in accordance with those conditions.

The Commission is empowered to deny a permit for failure to meet the requirements of this bylaw; for failure to submit necessary information and plans requested by the Commission; for failure to meet the design specifications, standards, and other requirements in regulations of the Commission; for failure to site the project in an alternative manner with less potential impact, where such siting is clearly possible; for failure to avoid or prevent unacceptable significant or cumulative effects upon the resource area values protected by this bylaw; and where no conditions are adequate to protect those values. Due consideration shall be given to any demonstrated hardship on the applicant by reason of denial, as presented at the public hearing.

Lands within 200 feet of rivers, ponds and lakes and lands within 100 feet of other resource areas are presumed important to the protection of these resources because activities undertaken in close proximity to resource areas have a high likelihood of adverse impact upon the wetlands or other resource. These adverse impacts from construction and use can include, without limitation, erosion, siltation, loss of groundwater recharge, poor water quality, and loss of wildlife habitat. The Commission therefore may require that the applicant maintain a strip of continuous, undisturbed vegetative cover within the 200-foot (or 100-foot) area, unless the applicant convinces the Commission that the area or part of it may be disturbed without harm to the values protected by this bylaw.

To prevent wetlands loss, the Commission shall require applicants to avoid alteration where feasible; shall minimize wetlands alteration; and, where alteration is unavoidable, shall require full mitigation. The Commission may authorize or require replication of wetlands as a form of mitigation.

A permit shall expire three years from the date of issuance. Any permit may be renewed once for an additional one year provided that a request for renewal is received in writing by the Commission prior to expiration.

No work proposed in any permit application shall be undertaken until the permit issued by the Commission has been recorded in the registry of deeds and the permit holder certifies in writing to the Commission that the permit has been recorded.

VII

Setbacks

- A. No subsurface sewage disposal system will be permitted within the 100-foot buffer zone of any wetland or within 200 feet of any perennial stream as shown on the USGS map 1985 or later. This set back will not be required for the renovation or replacement (but is required for the substantial enlargement) of septic systems construction.
- B. No dwelling or structure shall be built less than 50 feet from the outer edge of any wetland.
- C. A 25-foot minimum undisturbed vegetated buffer zone will be required to protect wetlands and wildlife.
- D. Isolated wetlands and vernal pools will be considered wetlands and afforded the same minimum setback distances for septic systems, construction and undisturbed

vegetative zones.

- E. Vernal Pool should hold special protections and will have a migration corridor of at least 100 feet to other wetlands or natural environment from the mean annual high-water mark that will be left in its natural and undisturbed state.

VIII

Regulations

Additions, deletions and alterations to the above regulations may be made through public notice and public hearing. The Commission shall then promulgate rules and regulations to effectuate the purposes of the bylaw when voted and filed with the town clerk. Failure by the Commission to promulgate such rules and regulations or a legal declaration of their invalidity by a court of law shall not act to suspend or invalidate the effect of this bylaw.

IX

Definitions

The following definitions shall apply in the interpretation of this by law.

The term "bank" shall include the land area which normally abuts and confines a water body; the lower boundary being the mean annual low flow level, and the upper boundary being the first observable break in the slope or the mean annual flood level, whichever is higher.

The term "vernal pool" shall include a confined basin depression which, at least in most years, holds water for a minimum of two continuous months during the spring/summer, and which is free of adult fish populations, as well as the area within 100 feet of the mean annual boundary of such a depression, regardless of whether the site has been certified by the Massachusetts Division of Fisheries and Wildlife.

It shall include, in addition to scientific definitions found in the regulations under the Wetlands Protection Act, any confined basin or depression not occurring in existing lawns, gardens, landscaped areas or driveways which, at least in most years, holds water for a minimum of two continuous months during the spring and/or summer, contains at least 200 cubic feet of water at some time during most years, is free of adult predatory fish populations, and provides essential breeding and rearing habitat functions for amphibian, reptile or other vernal pool community species, regardless of whether the site has been certified by the Massachusetts Division of Fisheries and Wildlife. The boundary of the resource area for a Vernal Pool shall be 100 feet outward from the mean annual high-water line defining the depression, but shall not include a lawn, garden, landscaped area or developed area in existence at the time of the effective date of this provision in this chapter.

The term "rare species" shall include, without limitation, all vertebrate and invertebrate animals and plant species listed as endangered, threatened, or of special concern by the Massachusetts Division of Fisheries and Wildlife, regardless of whether the site in which they occur has been previously identified by the Division.

The term "person" shall include any individual, group of individuals, association, partnership, corporation, company, business organization, trust, estate, the Commonwealth or political subdivision thereof to the extent subject to town bylaws, administrative agency, public or quasi-public corporation or body, this municipality, and any other legal entity, its legal representatives, agents, or assigns.

The term "alter" shall include, without limitations, the following activities when undertaken to, upon, within or affecting resource areas protected by this bylaw:

- A. Removal, excavation, or dredging of soil, sand, gravel, or aggregate materials of any kind
- B. Changing of preexisting drainage characteristics, flushing characteristics, salinity distribution, sedimentation patterns, flow patterns, or flood retention characteristics
- C. Drainage or other disturbance of water level or table
- D. Dumping, discharging, or filling with any material, which may degrade water quality
- E. Placing of fill, or removing of material, which would alter elevation
- F. Driving of piles, erection, or repair of buildings, or structures of any kind
- G. Placing of obstructions or objects in water
- H. Destruction of plant life including cutting of trees
- I. Changing temperature, biochemical oxygen demand, or other physical, biological, for chemical characteristics of any waters
- J. Any activities, changes, or work, which may cause or tend to contribute to pollution of any body of water or groundwater
- K. Incremental activities, which have, or may have, a cumulative adverse impact on the resource areas protected by this bylaw.

Except as otherwise provided in this bylaw or in regulations of the Commission, the definitions of terms in this bylaw shall be set forth in the Wetlands Protection Act (G.L. Ch. 131~40) and Regulations (310 CMR 10.00).

X

Enforcement

No person shall remove, fill, dredge, build upon, or otherwise alter resource areas protected by this bylaw, or cause, suffer, or allow such activity, or leave in place unauthorized fill or otherwise fail to restore illegally altered land to its original condition, or fail to comply with a permit or an enforcement order issued pursuant to this bylaw.

The Commission, its agents, officers, and employees shall have authority to enter upon privately owned land for the purpose of performing their duties under this bylaw and may make or cause to be made such examinations, surveys, or sampling as the Commission deems necessary, subject to the constitutions and laws of the United States and the Commonwealth.

The Commission shall have the authority to enforce this bylaw, its regulations, and permits issued hereunder by violation notices, administrative orders (if Dighton should accept G.L. Ch. 40~21D), and civil and criminal court actions. Any person who violates provisions of this bylaw may be ordered to restore the property to its original condition and take other action deemed necessary to remedy such violation, or may be fined, or both.

Upon request of the Commission, the ~~Select board~~ **Selectmen** and the town counsel shall take legal action for enforcement under civil law. Upon request of the Commission, the chief of police shall take legal action for enforcement under criminal law.

Municipal boards and officers, including any police officer or other officer having police power, shall have authority to assist the Commission in enforcement.

Any person, who violates any provision of this bylaw, or regulations, permits, or administrative orders issued hereunder, shall be punished by a fine of not more than \$300. Each day or portion thereof during which a violation continues, or unauthorized fill or other alteration remains in place, shall constitute a separate offense, and each provision of the bylaw, regulations, permits, or administrative orders violated shall constitute a separate offense.

XI **Burden of Going Forward and Burden of Proof**

- A. The applicant for a permit shall have the burden of proving by a preponderance of the credible evidence that the work proposed in the application will not have unacceptable significant or cumulative effect upon the resource area values protected by this bylaw. Failure to provide adequate evidence to the Commission supporting this burden shall be sufficient cause for the Commission to deny a permit or grant a permit with conditions.

Burden of going forward. The project proponent shall have the burden of going forward with credible evidence from a competent source in support of all matters asserted pursuant to Subsection B below.

- B. Burden of proof
1. Permit for work. The Applicant shall have the burden of proving by a preponderance of the credible evidence that any proposed work and its natural and consequential cumulative impacts and effects shall have no adverse effect upon any of the Bylaw wetland values and, further, shall contribute to the protection of the Bylaw wetland values by complying with the general performance standards established for each Bylaw resource area. Failure to meet the burden of proof shall be cause for the Conservation Commission to deny the application for a permit for work along with any work or activity proposed therein.
 2. Determinations of applicability and resource delineation. The Applicant shall have the burden of proving by a preponderance of the credible evidence that the Conservation Commission does not have jurisdiction over the proposed activity (work), in a request for a determination of applicability; and that the boundaries of the resource areas subject to protection under the Bylaw (Bylaw resource areas) are accurate, in a request for a determination of resource delineation.

 4. Waiver. The Commission may waive a performance standard set forth in these Bylaw. The person requesting a waiver of a performance standard shall have the burden of demonstrating by clear and convincing evidence that:
 - a. there are no reasonable conditions or alternatives that would allow the proposed activity to proceed in compliance with said Bylaw;
 - b. avoidance, minimization and mitigation have been employed to the maximum extent practicable and the proposed work, including all mitigation measures, and

- the natural and consequential cumulative effects of the work, will have no significant adverse effects upon any of the Bylaw wetland values;
 - c. the project provides benefits a demonstrable public interest; and
 - d. the project is otherwise in compliance with this Bylaw.
5. Waiver for Rare Species Habitat. Notwithstanding above, where the project limit of work is within or abuts an estimated rare species habitat as designated on the most current map prepared by the Massachusetts Natural Heritage & Endangered Species Program (NHESP), the Commission shall be diligent in its review of the proposed activity. The Commission may consider waiving the rare species performance standard when the following conditions are met in addition to the requirements in the Bylaw. The Applicant for a waiver of a performance standard shall have the burden of demonstrating by clear and convincing evidence that:
- a. The MA Natural Heritage and Endangered Species Program (NHESP) has been consulted, and has issued a formal determination, prior to filing a request with the Commission; and
 - b. The project has been designed in accordance with any formal determination of the NHESP to address the standards in the MA Endangered Species Act and its implementing regulations at 321 CMR 10.00; and
 - c. At least 14 days prior to the public hearing, the Applicant must provide to the Commission the NHESP determination and accompanying comments. The Commission cannot close the hearing until the NHESP has been consulted and has submitted written comments.

XII **Appeals**

A decision of the Commission shall be reviewable in the Superior Court in accordance with G.L. Ch. 249~4

XIII **Relationship to the Wetlands Protection Act**

ARTICLE XXXVII **STORMWATER**

INTRODUCTION

It is hereby determined that:

Land development projects and other land use conversions, and their associated changes to land cover, permanently alter the hydrologic response of local watersheds and increase stormwater runoff rates and volumes, which in turn increase flooding, stream channel erosion, and sediment transport and deposition, and decrease groundwater recharge;

Land development projects and other land use conversions also contribute to increased nonpoint source pollution and degradation of receiving waters;

The impacts of post-development stormwater runoff quantity and quality can adversely affect public safety, public and private property, surface water drinking water supplies, groundwater resources, drinking water supplies, recreation, aquatic habitats, fish and other aquatic life, property values and other uses of lands and waters;

These adverse impacts can be controlled and minimized through the regulation of stormwater runoff quantity and quality from new development and redevelopment, by the use of both structural and nonstructural Best Management Practices;

Localities in the Commonwealth of Massachusetts are required to comply with a number of both State and Federal laws, regulations and permits which require a locality to address the impacts of post-development stormwater runoff quality and nonpoint source pollution.

Therefore, the Town of Dighton has established this stormwater management bylaw to provide reasonable guidance for the regulation of post-development stormwater runoff for the purpose of protecting local water resources from degradation. This bylaw regulates the post-construction stormwater controls for both new and re-development projects.

It has been determined that it is in the public interest to regulate post-development stormwater runoff discharges in order to control and minimize increases in stormwater runoff rates and volumes, post-construction soil erosion and sedimentation, stream channel erosion, and nonpoint source pollution associated with post-development stormwater runoff.

1.0 PURPOSE

- A. The purpose of this Bylaw is to protect, maintain and enhance the public health, safety, environment and general welfare by establishing minimum requirements and procedures to control the adverse effects of increased post-development stormwater runoff and nonpoint source pollution associated with new development and redevelopment. It has been determined that proper management of post-development stormwater runoff will minimize damage to public and private property and infrastructure, safeguard the public health, safety, environment and general welfare of the public, protect water and aquatic resources, and promote groundwater recharge to protect surface and groundwater drinking supplies. This Bylaw seeks to meet that purpose through the following objectives:
1. Establish decision-making processes surrounding land development activities that protect the integrity of the watershed and preserve the health of water resources;
 2. Require that new development, redevelopment and all land conversion activities maintain the after- development runoff characteristics as equal to or less than the pre-development runoff characteristics in order to reduce flooding, stream bank erosion, siltation, nonpoint source pollution, property damage, and to maintain the integrity of stream channels and aquatic habitats;
 3. Establish minimum post-development stormwater management standards and design criteria for the regulation and control of stormwater runoff quantity and quality; Establish minimum design criteria for the protection of properties and aquatic resources downstream from land development and land conversion activities from damages due to increases in volume, velocity, frequency, duration, and peak flow rate of storm water runoff; Establish minimum design criteria for measures to minimize nonpoint source pollution from stormwater runoff which would otherwise degrade water quality;
 4. Establish design and application criteria for the construction and use of structural stormwater control facilities that can be used to meet the minimum post-development stormwater management standards;
 5. Encourage the use of nonstructural stormwater management, stormwater better site design practices or “low-impact development practices”, such as reducing impervious cover and the preservation of greenspace and other natural areas, to the maximum extent practicable; Coordinate site design plans, which include greenspace, with the Town’s greenspace protection plan;
 6. Establish provisions for the long-term responsibility for and maintenance of structural stormwater control facilities and nonstructural stormwater management practices to ensure that they continue to function as designed, are maintained, and pose no threat to public safety;
 7. Establish provisions to ensure there is an adequate funding mechanism, including surety, for the proper review, inspection and long-term maintenance of stormwater facilities implemented as part of this Bylaw;
 8. Establish administrative procedures for the submission, review, approval or disapproval of stormwater management plans, and for the inspection of approved active projects, and long-term follow up; Establish certain administrative procedures and fees for the submission, review, approval, or disapproval of stormwater plans, and the inspection of approved projects.
- B. Nothing in this Bylaw is intended to replace the requirements of the Town of Dighton Zoning Bylaws, the Town of Dighton General Wetlands Protection Bylaw, or any other Bylaw that may be adopted by the Town of Dighton. Any activity subject to the provisions of the above-cited Bylaws must comply with the specifications of each.

2.0 DEFINITIONS

The following definitions shall apply in the interpretation and implementation of this Bylaw. Additional definitions may be adopted by separate regulation:

ALTER:

Any activity, which will measurably change the ability of a ground surface area to absorb water or will change existing surface drainage patterns. Alter may be similarly represented as “alteration of drainage characteristics,” and “conducting land disturbance activities.”

BEST MANAGEMENT PRACTICE (BMP):

Structural, non-structural and managerial techniques that are recognized to be the most effective and practical means to prevent and/or reduce increases in stormwater volumes and flows, reduce point source and nonpoint source pollution, and promote stormwater quality and protection of the environment. “Structural” BMPs are devices that are engineered and constructed to provide temporary storage and treatment of stormwater runoff. “Nonstructural” BMPs use natural measures to reduce pollution levels, do not require extensive construction efforts, and/or promote pollutant reduction by eliminating the pollutant source.

BETTER SITE DESIGN:

Site design approaches and techniques that can reduce a site’s impact on the watershed through the use of nonstructural stormwater management practices. Better site design includes conserving and protecting natural areas and greenspace, reducing impervious cover, and using natural features for stormwater management.

DETENTION BASIN:

A detention basin is a stormwater management facility installed on, or adjacent to, tributaries of rivers, streams, lakes or bays that is designed to protect against flooding and, in some cases, downstream erosion by storing water for a limited period of a time. These basins are also called "dry ponds", "holding ponds" or "dry detention basins" if no permanent pool of water exists. Some detention ponds are also "wet ponds" in that they are designed to permanently retain some volume of water at all times. In its basic form a detention basin is used to manage water quantity while having a limited effectiveness in protecting water quality, unless it includes a permanent pool feature.

Amended (ATM 06/08/2010)

GENERAL STORMWATER MANAGEMENT PERMIT (GSMP):

A permit issued for an application that meets a set of pre-determined standards outlined in the Regulations to be adopted by the Board of Health under Section 4 of this Bylaw. By meeting these pre-determined standards, the proposed project will be presumed to meet the requirements and intent of this Bylaw.

HOTSPOT:

Land uses or activities with higher potential pollutant loadings, such as auto salvage yards, auto fueling facilities, fleet storage yards, commercial parking lots with high intensity use, road salt storage areas, commercial nurseries and landscaping, outdoor storage and loading areas of hazardous substances, or marinas.

INFILTRATION BASIN:

An infiltration basin is a stormwater management facility designed to direct all or part of the stormwater into the soil. Infiltration is the process by which runoff percolates through the unsaturated over-burdened and fractured bedrock to the water table. Infiltration does not include incidental wetting of soil in ditches, detention basins or the equivalent; wetting of under drained basins, dry swales, or similar filtration systems; or wetting of buffers meeting the town's requirements for use as stormwater control.

Discharge of runoff to areas of the site where the water will collect and percolate into the ground is considered infiltration if the volume, rate, or quality of the discharge exceeds the runoff capacity of the area. Under drained swales, under drained ponds, and similar practices that discharge to surface waters or to buffer strips meeting the town's requirements for stormwater buffers are not considered infiltration systems, although these may be used to treat runoff prior to discharge to an infiltration Area.

Amended (ATM 06/08/2010)

MASSACHUSETTS STORMWATER MANAGEMENT POLICY:

The Policy issued by the Department of Environmental Protection, and as amended, that coordinates the requirements prescribed by state regulations promulgated under the authority of the Massachusetts Wetlands Protection Act G.L. c. 131 § 40 and Massachusetts Clean Waters Act G.L. c. 21, §. 23-56. The Policy addresses stormwater impacts through implementation of performance standards to reduce or prevent pollutants from reaching water bodies and control the quantity of runoff from a site.

NEW DEVELOPMENT:

Any construction or land disturbance of a parcel of land that is currently in a natural vegetated state and does not contain alteration by man-made activities.

NONPOINT SOURCE POLLUTION:

Pollution from many diffuse sources caused by rainfall or snowmelt moving over and through the ground. As the runoff moves, it picks up and carries away natural and human-made pollutants, finally depositing them into water resource areas.

PERSON:

Any individual, group of individuals, association, partnership, corporation, company, business organization, trust, estate, the Commonwealth or political subdivision thereof to the extent subject to Town Bylaws, administrative agency, public or quasi-public corporation or body, the Town of Dighton, and any other legal entity, its legal representatives, agents, or assigns.

PRE-DEVELOPMENT:

The conditions that exist at the time that plans for the land development of a tract of land are submitted to the Planning Board. Where phased development or plan approval occurs (preliminary grading, roads and utilities, etc.), the existing conditions at the time prior to the first plan submission shall establish pre-development conditions.

POST-DEVELOPMENT:

The conditions that reasonably may be expected or anticipated to exist after completion of the land development activity on a specific site or tract of land. Post-development refers to the phase of a new development or redevelopment project after completion, and does not refer to the construction phase of a project.

RECHARGE:

The replenishment of underground water reserves.

REDEVELOPMENT:

Any construction, alteration, or improvement exceeding land disturbance of 35,000 square feet, where the existing land use is commercial, industrial, institutional, or multi-family residential.

Amended (STM 11/02/2009)

BOARD OF HEALTH:

The Board of Health for the town of Dighton or its authorized agent(s) is responsible for coordinating the review, approval and permit process as defined in this Bylaw. Other Boards and/or departments participate in the review process as defined in the Stormwater Regulations adopted by the town of Dighton..

RETENTION BASIN:

A retention basin is a type of best management practice (BMP) that is used to manage stormwater runoff to prevent flooding and downstream erosion, and improve water quality in an adjacent river, stream, lake or bay. Sometimes called a wet pond or wet detention basin, it is essentially an artificial lake with vegetation around the perimeter, and includes a permanent pool of water in its design.

It is distinguished from a detention basin, sometimes called a dry pond, which temporarily stores water after a storm, but eventually empties out at a controlled rate to a downstream water body. It also differs from an infiltration basin which is designed to direct stormwater to groundwater through permeable soils.

Wet ponds are frequently used for water quality improvement, groundwater recharge, flood protection, aesthetic improvement or any combination of these. Sometimes they act as a replacement for the natural absorption of a forest or other natural process that was lost when an area is developed. As such, these structures are designed to blend into neighborhoods and viewed as an amenity.

Silviculture: The cultivation and care of trees in a forest; forestry.

Amended (ATM 06/08/2010)

STORMWATER CREDITS:

A form of incentive for developers to promote conservation of natural and open space areas. Projects that comply with prescribed requirements are allowed reductions in stormwater management requirements when they use techniques to reduce stormwater runoff at the site.

STORMWATER MANAGEMENT PERMIT (SMP):

A permit issued by the Board of Health, after review of an application, plans, calculations, and other supporting documents, which is designed to protect the environment of the Town from the deleterious affects of uncontrolled and untreated stormwater runoff.
